3.1.1. STEP 1 - FORKING THE AI4T GITHUB REPOSITORY

1- CREATE AN ACCOUNT ON GITHUB

The preliminary step is to create an account on GitHub (it's free) if you do not already have one.

Creating an account ob github.

Access to the sign up page on GitHub

2- ACCESS THE GITHUB REPOSITORY OF THE PROJECT AI4T

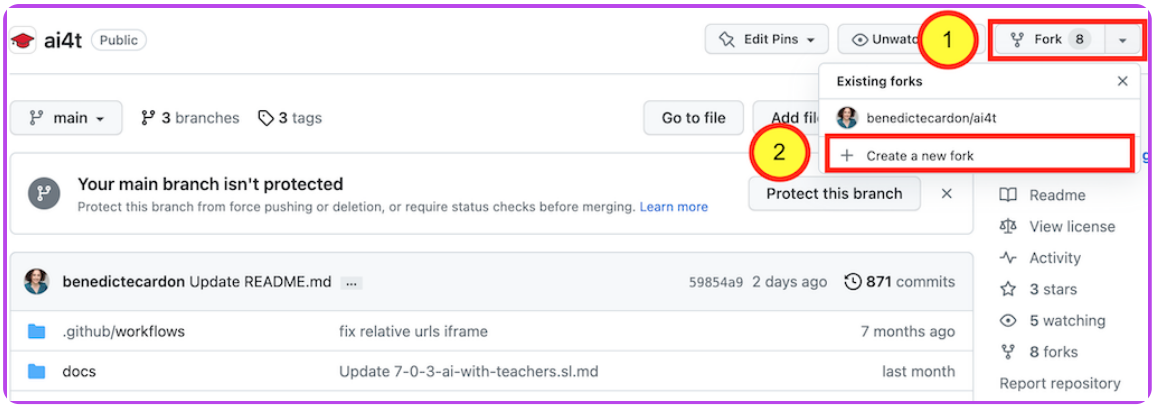

Address of the GitHub repository of the AI4T project: https://GitHub.com/inrialearninglab/ai4t

3- CREATE A FORK OF THE REPOSITORY

A fork is an extensive copy of elements (from contents to commands) of the GitHub repository but it is detached from the **main**.

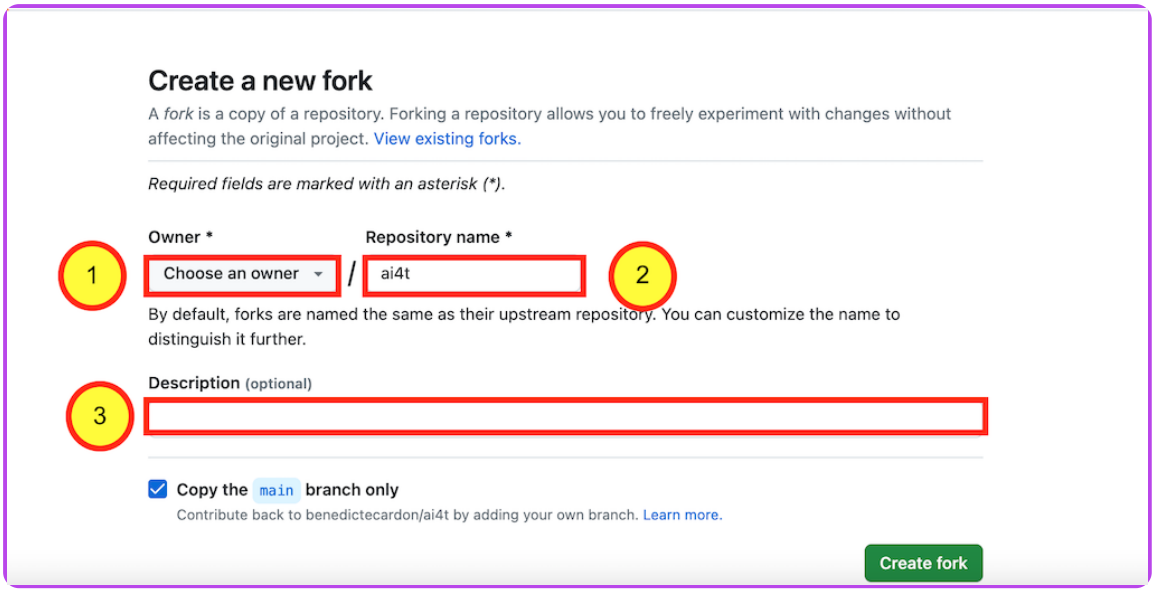

Therefore you can do whatever you want in it without impacting the AI4T Mooc. However if you want to keep up with evolution in the **main**, you can **synchronise** your fork whenever you want

Resource designed by Inria within the AI4T Erasmus+ project | CC BY 4.0 (unless otherwise specified) | 2022

Creating a fork on github.

Once created, the fork has to be named.

Naming a fork on github.

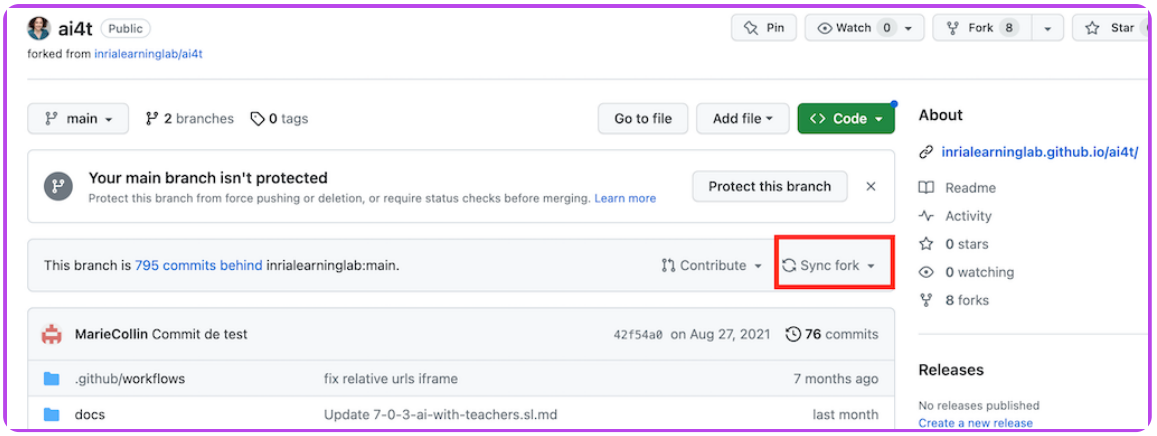

We encourage you to:

1 : Choose the right name for your account

2 : Keep **AI4T** in the repository name

3 : And to add as **description** the new target language you are developing

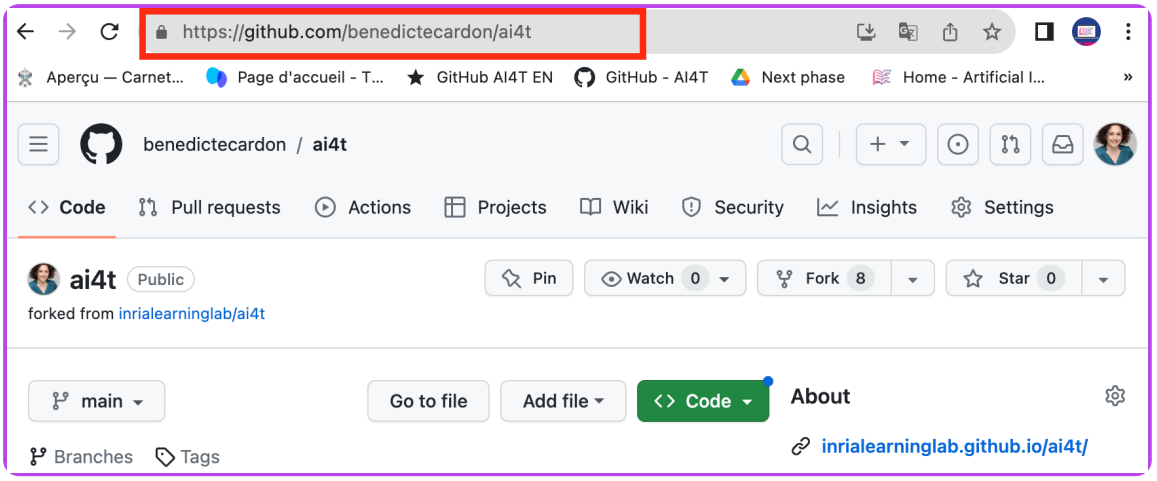

Remember : It's always possible to keep up with the evolution of the initial GitHub repository by "sychronising" you own repository with the AI4T one.

Synchronising a fork on github.

4- YOUR FORK IS NOW READY AT YOUR PERSONALISED URL ADDRESS:

Example of personalised URL : https://GitHub.com/ **YOURNAME** /ai4t

ID of a fork as mentionned in the URL of its static web pages.
